The Whigs of the United States, in Convention assembled, firmly adhering to the great conserva-tive republican principles by which they are controlled and governed, and now, as ever, relying upon the intelligence of the American people, with an abiding confidence in their capacity for selfgovernment and their continued devotion to the constitution and the Union, do proclaim the fol-lowing as the political sentiments and determinafor the establishment and maintenance of tions for the establishment and maintenance of which their national organization as a party is

1. The government of the United States is of a limited character, and it is confined to the ex-ercise of powers expressly granted by the consti-tution, and such as may be necessary and proper for carrying the granted powers into full execu-

for carrying the granted powers into full execution; and that all powers not thus granted or necessarily implied are expressly reserved to the States, respectively, and to the people.

2. The State governments should be held secure in their reserved rights, and the general government sustained in its constitutional powers, and the Union should be revered and watched over as "the palladium of our liberties."

3. That, while struggling freedom everywhere enlists the warmest sympathy of the Whig party, we still adhere to the doctrines of the Father of his Country, as announced in his Farewell Address, of keeping ourselves free from all entandress, of keeping ourselves free from all entangling alliances with foreign countries, and of never quitting our own to stand upon foreign ground. That our mission as a republic is not to propagate our opinions, or impose on other counries our form of government by artifice or force, but to teach by example, and show, by our suc-cess, moderation, and justice, the blessings of self-government and the advantages of free in-

4. That where the people make and control the government, they should obey its constitution, laws, and treaties, as they would retain their self-respect and the respect which they claim and

will enforce from foreign powers.
5. Government should be conducted upon principles of the strictest economy, and revenue sufficient for the expenses thereof, in time of peace, ought to be mainly derived from a duty on imports, and not from direct taxes; and in levying such duties, sound policy requires a just discrimi-nation, and protection from fraud by specific du-ties when practicable, whereby suitable encouragement may be assured to American industry, equally to all classes and to all portions of the

country.
6. The constitution vests in Congress the power to open and repair harbors, and remove obstructions from navigable rivers; and it is expedient that Congress should exercise that power, whenever such improvements are necessary for the common defence, or for the protection and facility of commerce with foreign nations or among the States: such improvements being, in every instance, national and general in their character.
7. The federal and State governments are parts

of one system, alike necessary for the common prosperity, peace, and security, and ought to be regarded alike with a cordial, habitual, and mmovable attachment. Respect for the authority of each, and acquiescence in the constitu-tional measures of each, are duties required by the plainest considerations of national, of State and of individual welfare.

8. The series of acts of the 31st Congress com-

monly known as the Compromise or Adjustment (the act for the recovery of fugitives from labor incladed) are received and acquiesced in by the Whigs of the United States as a final settlement, in principle and substance, of the subjects to which they relate; and, so far as these acts are concerned, we will maintain them, and insist on their strict enforcement, until time and experience shall demonstrate the necessity of fur-ther legislation, to guard against the evasion of the laws on the one hand, and the abuse of their powers on the other-not impairing their present efficiency to carry out the requirements of the constitution; and we deprecate all further agita-tion of the questions thus settled, as dangerous to our peace, and will discountenance all efforts to continue or renew such agitation, whenever, wherever, or however made; and we will maintain this settlement as essential to the nationality

of the Whig party and the integrity of the Union.

the patronage of the public.

B. A. CLARK & CO. Mexican Mustang Liniment!
THE EVIDENCES ACCUMULATE!

READ the following proof of what we have long since asserted, viz: that the Mustang Liniment is the sinc qua non of all external remedies ever before offered to the affilicted:

qua non of an external remenes, ever before onered to the afflicted:

"Wm. M. Johnston, No. 112 Second street, Pittsburg, says that he had a severe attack of Rheumatism in his right hip: after suffering some ten days, the left hip also became af fected, and he was obliged to 'lay up.' The pain was contant and exeruciating. He had heard of the wonderful effects of the Mustang Liniment in Rheumatism, and determined to try it. One small bottle, thoroughly applied, performed a perfect cure! B. H. Meakings, 189 Walnut street, Cincianuti, was confined to his bed and under treatment of a physician some six weeks with Neuraigia of the whole of his right side, leg, arm, and face. His sufferings were indescribable, and the only essation from the most agonizing pain was while under the influence of opium or morphine. His doctor finally advised him to try the Mustang Liniment; he did so, and in two days was able to go about his business, perfectly cured."

"THE LAME MADE TO WALK.—About the first of April I

did so, and in two days was able to go about his business, perfectly cured."

"The Lame made to Walk.—About the first of April I cut and laid open the fore finger of my left hand, through the bone and across the second joint, nearly dissevering it from the hand, being about two-thirds off. I was fearful that I should lose the use of my finger forever; but I bound it up with the Mexican Mustang Liniment, and it soon healed up, and is now perfectly well, though somewhat scarrified. I used nothing but the Mustang Liniment.

"About one week ago I had the misfortune to cut the cap of my left knee in two with the sharp corner of an axe. The cap was split assunder, and for a day or two I could not use my leg at all, and I was afraid that I would lose its use forever. The cap was cut and cleft to the joint with a deep and alsrming gash, and it gave me great pain and uneasiness, lest I should be entirely deprived of the use of my leg. I applied the Mexican Mustang Liniment, and that alone, in both of the above cases, and I am now quite well, except the cap of my knee is a little swollen, and is tender about the cut, which is healed up and shows a fresh red appearance of about one inch and a half in length and a quarter of an inch in width, but gives me no inconvenience whatever.

"I walked fifteen miles yesterday out of the thirty miles from the place where I live near the Sulphur Springs, in Jefferson county, and feel able to walk as many more today. My recovery has been so wonderful that I feel it my duty to make it public, that the world may know the value of the Moxican Mustang Liniment.

AARON ROSE.

"Sulphur Springs, Jept. Co., Mo."

PRICES OF THE LINIMENT.

It is put up in bottles of three sizes, and retails at 25 cents, 50 cents, and §1 per bottle. The 50-cent and dollar bottles contain 50 and 100 per cent. more Liniment, in proportion to their cost, so that money is saved by buying the large sizes.

SELECT Classical & Mathematical School.

THE subscriber proposes to open in the city of Washington, on the 13th of September, a Classical rand Mathematical School of a high order. For this purpose he has secured a central and very desirable location on the south side of F street, three doors west from 13th.

The number of pupils will be limited to twenty. To these he will devote his exclusive attention, in preparing them for college or for business and professional pursuits.

It is the design to make this a permanent Classical and Mathematical School, with a number so limited that each pupil may receive a large share of the teacher's attention; and the result of his own experience and that of others convince him that he can in this way accomplish much more for their mental and moral improvement, and for their thorough and rapid progress in study, than can be done in a school of a larger number or of a more miscellaneous character.

From the views expressed to the subscriber be intelligent.

school of a larger number or of a more miscellaneous character.

From the views expressed to the subscriber by intelligent persons, it is believed there are many in this city who desire the establishment of such a school at the present time; and all of his energies, guided by his past experience in the instruction of youth, will be devoted to making it, in all respects, worthy of the confidence and patronage of those who may be disposed to place their sons under his charge. Terms, per quarter, \$12.50.

Refer to the Faculty of Columbian College; to Col. J. L. Edwards; Col. Peter Force; William Gunton, esq.; Rev. R. W. Cushman; Hon. Wm. Morgan, Trensury Department; D. T. V. Leach, esq. Post Office Department.

DENTISTRY.

DENTISTRY.

R. CASADAVANT, Surgeon Dentist, formerly from Paris and New York, returns hissi neare thanks to the citizens of Washington and Georgetown and vicinities for the liberal patronage which they have extended: 1 the since he has established himself in this city, and would in form them that he has removed to Lance & Tacker's building, on Pennsylvania avenue, between the National Hotel and 4½ street, where he still continues to perform all operations in his profession in a superior manner, at New York prices, so as to enable all to test his skill, and he warrants his work to be equal to that of the best Dentists. As he manufactures his own artificial teeth, he is enabled to suit all cases, and will undertake to perform all those operations in which other Dentists have falled to succeed. He will refer to many citizens of Washington and Georgetown, for whom he has performed operations.

SWIENTS! SHIETS!! SHIETS!!

WILLIAM H. FAULKNER,
Shirt manufacturer, south side of
Pennsylvania avenue, opposite the
U.S. Hotel, would respectfully inform members of Congress, citizens, and strangers, that he is now
preparad to supply them with
Shirts of his own make of superior
style and fit. Those gentlemen
that have been troubled with bed
fitting Shirts, can, by calling at
his Shirt Manufactory, have Shirts
made to their order, which he will
warrant to fit and give satisfaction
or no sale. Also on hand a fine
assortment of Silk and Merino Undershirts and Drawers, Gloves,
Collars, Suspenders, Cravatz, and
overy article suitable for a gentleman's wardrobe, which will be sold
as low as they can be bought in
New York. Thankful for the encouragement he has received from the members of Congress, citizans, and strangers, he now hopes, by a strict attention to business, and
a determination to please, to merit a continuation of past
fayors.

Jan 24—cotf Protection from Lightning.

Protection from Lightning.

The undersigued, being the duly appointed Agent of Spratt's Electratora and Electro-Matallians's Loarsino-Rod Manufactors, Covington, Kentucky, begs to offer these superior Rods, of Spiral-twisted, Carbonized Annealed Iron, with Zinc Protectors, and Electro-positive elements combined in their manufacture; thus rendering them equal to copper as conductors. They are in ten-feet lengths, with accurately-fitted brass-serew connecting joints, an entire new style of metallic (patented) attachments, for brick or frame buildings; also, glass isolaters, of a novel and ingenious construction, (patented,) forming a lock; the whole mounted with a solid platinum silver point, (patented,) twelve inches long, surrounded at the base with three angular negative magnets, which possess the power, to an extraordinary extent, of discharging the opposite elements of the most fearful thunderstorm, and embrace the entire perfection of science up to the present time; the whole constituting the most magnificent and perfect silent conductor ever presented to the public.

Bafety has not been compromised by affording these excellent rods at such low rates; the greatest attention has been given to their construction, so as to be readily attached. The astonishing power of the negative magnets, in discharging the air of its opposite elements, has been clearly demonstrated by the Electrometer, when unmagnetized points have shown but slight results, though placed under the same conditions. In fact, they gather and silently discharge electricity from the atmosphere when you would scarcely suspect any being present.

These improvements being secured by double letters patent, you are hereby cautioned against laying yourselves liable, by purchasing of those who are not authorized, or who are substituting inferior imitations. All agents duly appointed can show their certificates. Have good rods or none.

CHARLES W. HEYDON,

I do hereby certify that I have app lied various powerful chemical re-agents to Spratt's Patent Points for Lightning-Rods, and that the results of these experiments convince me that they will resist the action of atmospheric causes, and thereby preserve the extremity sharp—a condition most essential to protection against lightning. The re-agents used in the above experiments were a solution of chloride of sodium, (common salt,) acetic acid, sulphuric acid, and hydrochloric acid. With the first, there was no action on the metal; with the several acids, there was very slight—a fact sufficient to show that atmospheric influences would have no sensible effect.

JOHN LECONTE, Prof. of Nat. Phil. et Chem.

to sensible effect.

UNIVERSITY OF GA., October S, 1850.

The Lightning Conductors of Mr. Spratt, effered to me, are well calculated to perform the office for which they are utended. Yours, truly,

LEXINGTON, KY., February 20, 1850.

This may certify that I have examined, somewhat critically, James Spratt's Patent Lightning Rods, and that I am of opinion that it is constructed on scientist principles. For combining durability, cheapness, and elicacy, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

Prof. JAS. V. Z. BLANEY.

or my inspection.

Prof. JAS. V. Z. BLANEY.

AUGUSTA, (Ga.) November 11, 1850.

This will certify that I have examined the Lightning Rods, Metallic Points, and Isolating Attachments, manufactured by Mr. Spratt, and regard them as constructed in conformity to the general laws of the electric fluid; and the metallic compound constituting the Points, as promising, from the result of several tests to which they were submitted, to resist for years the action of those atmospheric causes most likely to corrode them.

A. MEANS, Prof. Phys. Sc., Emory College, Ga., and Prof. Chem. and Pharm., Medical College, Ga.

The Lightning Conductors put up by Mr. Henry M. Smith,

Pharm., Medical College, Ga.

The Lightning Conductors put up by Mr.-Henry M. Smith, of this city, on the plan of Mr. Spratt, appear to me to be very well devised; and, in point of mechanical construction, are the best 1 have ever seen.

It is to be hoped that the use of these Rods may become general, as an important auxiliary defence against a danger which must be regarded as of no ordinary magnitude, to which all buildings are liable.

R. SILIMAN, J. Prof. of Chem. in the University of Louisville.

Louisvilla, January 27, 1851.
